

Your Guide to Prepare for Gamma Knife Trip to Spain

Documents and Visa Requirements

- Valid passport or travel document with at least three months beyond your planned date of departure from Spain.
- Check visa requirements and apply if needed via the official Spanish visa portal: <http://www.exteriores.gob.es/>.
- Medical documents: referral from your doctor, medical history, and records related to your condition.
- Some clinics may provide additional diagnostics and tests if certain medical documents are lacking, but it is essential to bring as much information as possible regarding your condition.

Accommodation Options

Patients can expect hospital stays, partner hotels with discounts, or self-booking options. While some clinics might offer free accommodation, it is not guaranteed. A hotel stay per night can average approximately 100-150 euros, depending on the location and rating of the hotel.

Transfer Services

- Clinics may offer paid airport transfer services; inquire with your medical coordinator.
- Popular taxi services include Radio Taxi and Fono Taxi, with prices ranging based on distance; approximately 30-40 euros from the airport to the city center.

Interpreter Services

Interpreter services are often available and can be arranged through the clinic, sometimes for a fee. Ensure to communicate your needs to your personal medical coordinator for assistance.

Payment Methods

- Payments can be made in cash or by card.
- The local currency is the Euro (EUR), and while some places may accept dollars or euros, it is recommended to have local currency for small expenses and convenience.

Pre-Op Gamma Knife Tips

- Follow any fasting instructions provided by the clinic for the day of the procedure.
- Arrange for someone to accompany you if possible, as you may need assistance post-procedure.
- Discuss any medications you are taking with your doctor, as some may need to be stopped before the surgery.
- Wear comfortable clothing and avoid bringing valuables to the hospital.
- Prepare a list of questions or concerns to discuss with your doctor before the procedure.
- Ensure you understand the postoperative care instructions that will be provided by your Gamma Knife doctor.
